

CoderSnap — Quick Setup Guide

Step 1: Install the Extension

1. Extract the **CoderSnap.zip** file to a folder on your computer

- Example: `C:\CoderSnap\`
- **Don't delete this folder** — Chrome needs it

1. Open Chrome and go to: `chrome://extensions`

1. Turn ON **Developer Mode** (top-right toggle)

1. Click "**Load unpacked**"

1. Select the `CoderSnap` folder you extracted

1. Done! You'll see the CoderSnap icon in your toolbar

Step 2: Activate Your License

1. Click the **CoderSnap icon** in your Chrome toolbar

1. Enter your **License Key** (format: XXXXX-XXXXX-XXXXX-XXXXX)

1. Enter your **Amazon hiring account email**

1. Click "**Activate License**"

1. You'll see "LICENSED" with days remaining — you're activated!

Step 3: Set Up AI CAPTCHA Solver (Free — Highly Recommended)

This lets CoderSnap auto-solve CAPTCHAs so login never stops.

1. Go to: <https://console.groq.com/keys>
 2. Sign up for free (no credit card needed)
 3. Click "**Create API Key**" — name it anything
 4. **Copy the key** (starts with `gsk_`) — Groq only shows it ONCE!
 5. Click CoderSnap icon → find "**GROQ API KEY**" field → paste your key
 6. Green checkmark = saved!
-

Step 4: Configure Your Search

Click the CoderSnap icon and set:

Setting	Recommended
Region	City closest to where you want to work
Radius	50–150 km
Shift Type	Any
Target Cities	Click "Any City" for maximum results
Scan Interval	2 seconds

Step 5: Start Hunting

1. Go to <https://hiring.amazon.ca> (or .com)
 2. Sign in to your Amazon hiring account
 3. **Allow pop-ups** when prompted (one-time):
 - Click the lock icon in address bar → Site settings → Pop-ups → Allow
 1. Click CoderSnap icon → toggle "**ACTIVATE HUNTER**" ON
 2. That's it! CoderSnap scans every 2 seconds and auto-applies when a job appears
-

Important Notes

- **Keep the Amazon tab open** — scanning only works while the tab is active
 - **Keep Chrome running** — scanning stops if you close the browser
 - **One license = one Amazon email = one computer** — cannot be transferred
 - **License is valid for 1 year** from activation date
 - If CAPTCHA appears during login, CoderSnap solves it automatically (requires Groq key)
 - You'll hear a sound + get a notification when a job is found and applied to
-

Troubleshooting

Problem	Fix
Extension not scanning	Make sure Hunter toggle is ON + you're on hiring.amazon.ca
"Rate limited"	Normal — auto-retries in a few seconds
CAPTCHA blocks login	Set up Groq API key (Step 3 above)
No jobs found	Increase radius to 150km + use "Any City"
License says expired	Your 1-year license ended — contact admin for renewal
